# Vehicle Fire Protection

When selecting a fire extinguisher for any risk, consideration must be given to a number of factors including the likely source of the fire. This is especially important when deciding on the best extinguisher for installation in a motor vehicle, caravan or boat.

**Australian Standard AS 2444** states;

*"For a car, caravan, small craft and the like, it is stressed that a fire extinguisher is provided for the initial stages of a fire. To gain access to awkward locations, consideration shall be given to the provision of an extinguisher fitted with a hose."*

### **EVERSAFE EAD-1sh 1.0kg ABE Powder Type Fire Extinguisher**

Unlike the majority of 1.0kg Powder Fire Extinguishers available, this model has been specifically developed provide full compliance with Australian Standard AS 2444 and offers superior fire extinguishing potential. A non corrosive transport bracket is supplied standard making this compact extinguisher an ideal 'Fire Safety Solution' for all cars, small boats, caravans and in the cabin of most cargo carrying vehicles.

### **EVERSAFE EAD-2sv 2.0kg ABE Powder Type Fire Extinguisher**

Larger fire risks generally require larger fire safety solutions so FireSafe also offers the same fire safety benefits in a 2.0kg model most suitable for installation on commercial vehicles and larger recreational vehicles. In most States, the recommendations of Australian Standard AS 2444 for passenger carrying vehicles such as buses is a legislated requirement and the EVERSAFE EAD-2sv model is fully compliant. This extinguisher is supplied with a corrosion resistant powder coated metal vehicle mounting bracket with a stainless steel securing strap. The release latch incorporates an anti vibration locking pin to prevent accidental opening of the bracket even when subjected to harsh vibration. For marine applications, we recommend the EAD-2sh model fitted with Stainless Steel handles and levers.

**EVERSAFE** also supplies an extensive range of larger capacity extinguishers and heavy duty brackets to suit all transport needs.
